Claim Objections

1. Claims 1-16 are objected to because of the following informalities: claim 1 recites "a multiple control circuits coupled to respective groups of capacitors". Such a claim language suggests that **a plurality of control circuits** are coupled to **a respective group of capacitors** while in fact each **of said plurality of control circuits** is coupled to **a respective one of said groups of capacitors**. The same comment applies to claim 9. Claim 5, line 2, "a mode" should be replaced by "said/the mode" so as to be consistent with antecedent in claim 1, line 9. claim 13, line 1, "and" should be deleted; line 2, "is set" should be deleted; line 3, "a mode" should be replaced by "said/the mode" so as to be consistent with antecedent in claim 9, last line. Claim 16, line 1, "and" should be deleted. Note that any claim whose base claim is objected is likewise objected to. Appropriate correction is required.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, (claim 1 reads on the embodiment of fig. 1) the phase detection circuit responsive **to mode switch**, as recited in claims 1 and 9; the phase detection circuit responsive **to a startup control signal**, as recited in claims 2 and 10; the plurality of phase calculators generating phase output, circuitry for combining said phase outputs, recited in claims 3-4 and 11-12; one of said phase calculator responsive **a mode switch, generating its outputs from the other phase calculators**, as recited in claims 5 and 13, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Conclusion

3. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

Claims 1-16 would be allowable if amended to overcome the objection set forth above.
